¹ The phrasing is deliberate, and not ‘climate change’ which is a more immediate concern as opposed to ‘climatic’ change over millennia.

² There is both written text and an illustration on page 2, so I have provided both locators separately. In a longer more detailed text this may not be the right solution.

⁵ This is a combination entry, so it could be argued that ‘gravel extraction’ should also be included, but as the phrase is always ‘sand and gravel extraction’, this is probably unnecessary.
